Dr. Adelina Ahmeti Pronaj is a Child and Adolescent Psychiatry Specialist and Assistant Professor at the University for Business and Technology (UBT), where she teaches *Biological Bases of Behavior* and *Psychophysiology*. With more than 17 years of combined clinical and academic experience, she works at the Center for Development and the Child and Adolescent Psychiatry Clinic at the University Clinical Center of Kosovo (UCCK), integrating clinical practice with ongoing research activities.

Her clinical focus includes the management of ADHD, autism spectrum disorders, and a broad range of psychiatric conditions in children and adolescents. Dr. Pronaj has participated in numerous national and international conferences as both an active presenter and attendee, and she contributes to research projects centered on neurodevelopmental disorders and the development of culturally adapted clinical tools for Albanian-speaking populations.

Her expertise spans complex diagnostic evaluations, parent psychoeducation, management of severe clinical cases, and the integration of evidence-based approaches with a compassionate, human-centered clinical style. She is widely recognized for her ability to balance scientific rigor with a warm and supportive approach to children and families.
